An approximate solution to these equations is given by $T \approx \frac{1}{\lambda_1 + \lambda_2} \ln \frac{N_1}{N_2}$ (9) In our laboratory we will measure N_1 , N_2 , and N_{12} and used the formula above to get an approximate value for the dead time of the Geiger counter. It is difficult to get a precise value for T . one needs to be very careful that the positions of source 1 and 2
